What additional benefits does my Critical Illness Insurance include?

The benefits listed below are also included with your Critical Illness coverage.

- **Waiver of Premium Benefit:** If you become totally disabled, you can continue your Critical Illness Insurance coverage for a period of time without needing to pay premiums. You may need to complete a waiting period of total disability before premiums are waived, during which time premiums need to be paid. Only premiums for employee coverage will be waived; all other coverage will terminate.
- **Wellness Benefit:** This provides an annual benefit payment if you complete a health screening test.
 - Your annual benefit amount is \$50 for completing a health screening test.
 - Your spouse's annual benefit amount is \$50 for completing a health screening test.
 - The annual benefit amount for each child is 50% of your benefit amount with an annual maximum of \$100 for all children.

How many times can I receive a benefit payment?

Each benefit payable will be no more than 100% of the Critical Illness benefit amount. The maximum amount payable during the insured person's lifetime is called the total maximum benefit. You may be eligible to receive benefit payments for multiple conditions, up to the total maximum benefit amount. Each diagnosis must be a different diagnosis.

The total maximum benefit amount equals two times the Critical Illness benefit amount for each covered condition. Once the total maximum benefit for a covered condition has been paid, no further benefits are payable for that same covered condition.

Please refer to your certificate of insurance and riders for more information.

What do you mean by different diagnosis?

To be eligible for a benefit payment, the diagnosis must be a "different diagnosis" than any previously diagnosed illness or condition. This can mean any of the following:

- An insured person has a diagnosis of a covered critical illness that is **different from a previously diagnosed illness or condition**. A cancer that has spread to a different area of the body is not a different illness/condition than the previously diagnosed cancer.
- An insured person receives a **subsequent diagnosis of a covered critical illness that is for the same illness or condition* as a critical illness for which benefits were payable under the critical illness insurance policy**. The subsequent diagnosis must occur more than 6 months after the date of the previous diagnosis.
- An insured person receives a **subsequent diagnosis of a covered critical illness that is for the same illness or condition* as an illness/condition previously diagnosed prior to his/her coverage effective date under the critical illness insurance policy**. The subsequent diagnosis must occur more than 6 months after the date of the previous diagnosis.

*Including a cancer that has spread to a different area of the body

Are there any exclusions or limitations?

Benefits are not payable for any critical illness resulting from a pre-existing condition if the date of diagnosis for the critical illness occurs during the first 6 months following the insured person's coverage effective date (including increases). Pre-existing condition means a sickness, injury or physical condition which, within the 3 month period prior to the insured person's coverage effective date, resulted in the insured person receiving medical treatment, consultation, care or services (including diagnostic measures).

Exclusions and limitations vary by state and by your employer's plan. Please review your certificate of coverage for details.
